CAPITALIZED PERSONAL PROPERTY FINANCIAL REPORTS

July 2010

(As of July 10, 2010)

PREPARED: 20100712 - FINAL
Sunflower Assets

U.S. Department of Commerce
National Oceanic and Atmospheric Administration
Office of the Chief Administrative Officer
Real Property, Facilities, and Logistics Office
Logistics Division

UNITED STATES DEPARTMENT OF COMMERCE
National Oceanic and Atmospheric Administration
OFFICE OF THE CHIEF ADMINISTRATIVE OFFICER
Logistics Division

MEMORANDUM FOR: Jon Alexander, Director
NOAA Finance Office

FROM: Joy D.D. Taylor,
Director, Logistics Operations Division

SUBJECT: NOAA Personal Property's Reports for the Month Ending July 10, 2010.

Attached are NOAA Personal Property's Financial Reports for the month ending July 10, 2010. The reports include an overall summary report, an acquisition cost roll-forward and related reconciliation, and a depreciation roll-forward and related reconciliation. These reports are by major asset category. We have included explanations of unusual variances, where appropriate.

Detail information pertaining to each asset is available on-line from the NOAA Personal Property Home Page at http://www.pps.noaa.gov . For information concerning access, contact the NOAA Property Management Officer.

cc: William F. Broglie, NOAA CAO

NOAA Personal Property

Introduction

In accordance with the Chief Financial Officers Act of 1990, as amended by the Government Management Reform Act of 1994, an audited consolidated financial statement must be prepared covering all accounts and associated activities of each office, bureau, and activity of the Department. This guidance requires that NOAA Personal Property report financial information related to its accounts and associated activities.

The attached financial reports reflect the acquisition cost and related depreciation for NOAA's Personal Property capital assets. These reports reflect the activity for the period as well as the beginning and ending balances.

In addition, attached are reports detailing Government Furnished Property, Unsupported Items, Property Awaiting Disposal, Property Awaiting Deployment, and Unreconciled Procurement.

For informational purposes included is a glossary of the reports that describes the information presented in each report. In addition, a glossary of relative terms is also included.

Notes:

A The useful life of a vessel (CD 0000433361) changed from 25 years to 9.5 years in Fiscal Year 2006, as a result of a change in policy. An entry to adjust accumulated depreciation was made in the Sunflower System to correct it in order for it to be in line with the vessel's new useful life. However, because there was a change in policy, no such entry to accumulated depreciation was needed. There is not a mechanism in the Sunflower System to reverse an adjustment to accumulated depreciation. Therefore, the net effect of the top sided entry has to be carried forward in Fiscal Year 2007 to correctly state the beginning balance.

B On-top adjustment for CD0001526967 and CD0001526968 due to asset accepted in FY 2009; however, these assets were entered into Sunflower after 9/30/2009 due to late receipt of supporting documentation

C Reversed the on-top adjustment made for CD0000433361 based on the review of supporting documentation

Notes:

A The useful life of a vessel (CD0000433361) changed from 25 years to 9.5 years in Fiscal Year 2006, as a result of a change in policy. An entry to adjust accumulated depreciation was made in the Sunflower System to correct it in order for it to be in line with the vessel's new useful life. However, because there was a change in policy, no such entry to accumulated depreciation was needed. There is not a mechanism in the Sunflower System to reverse an adjustment to accumulated depreciation. Therefore, the net effect of the top sided entry has to be carried forward in Fiscal Year 2007 to correctly state the beginning balance.

B Reversed the on-top adjustment made for CD0000433361 based on the review of supporting documentation

NOAA Personal Property
GLOSSARY OF TERMS

Acquisition and Grants Office (AGO): An agency service organization that provides financial assistance award and business management support services to its customers. Activities include: award, administration and closeout of grants, cooperative agreements and acquisitions, including all associated activities such as planning, market research, needs development, protest and/or dispute resolutions, and final receipt/acceptance/ payment.

Acquisition Cost: The cost incurred by NOAA to bring the property to a form and location for its intended use. It includes all transportation and installation costs. It does not include maintenance costs or warranty costs.

Acquisition Value: Same as acquisition cost.

Accumulated Depreciation: Total depreciation taken on an asset since the asset was acquired including the depreciation taken during the current accounting period.

Additions: Assets acquired by NOAA and improvements made to existing assets since the beginning of the current accounting period.

Adjustments: Corrections to the value of an asset as the result of information received the current accounting period. For example, the asset may have been added this accounting period at a value that later turned out to be in error and which therefore was corrected later in the accounting period.

Aircraft: One of NOAA's major categories of assets. Aircraft includes helicopters, single and dual propeller planes, and research aircraft.

ASOS (Automated Surface Observing System): One of NOAA's major categories of assets. The ASOS program is a joint effort of the NOAA Weather Service (NWS), the Federal Aviation Administration (FAA), and the Department of Defense (DOD). ASOS systems serve as the nation's primary surface weather observing network. This program acquired systems to collect, process, display, and transmit surface weather conditions, such as temperature and precipitation. ASOS, with the largest and most modern complement of weather sensors, detects significant changes, and disseminates hourly and special observations via the networks. Additionally, ASOS routinely and automatically provides computer-generated voice observations directly to aircraft in the vicinity of airports, using FAA ground-to-air radio.

AWIPS (Advanced Weather Information Processing System): One of NOAA's major categories of assets. AWIPS integrates satellite, radar, and other data to support weather forecaster decision-making and communications. Additionally, it integrates meteorological and hydrological observations and is the fundamental tool used by NWS forecasters to analyze and graphically display data used for weather forecasting.

NOAA Personal Property
GLOSSARY OF TERMS

Among the most important data utilized in AWIPS are imagery from NOAA's weather satellites and ground-based radar network. AWIPS, in conjunction with NWS' modernized observing systems, has enabled NWS to vastly improve the accuracy of forecasts and the timeliness for issuing severe weather warnings and watches. These improvements in forecast accuracy and timeliness have resulted in hundreds of lives being saved.

Beginning Balance: Equivalent to the previous accounting period's ending balance.

Boulder: One of NOAA's four regions. It used to be referred to as MASC.

Capital Lease – Non-Weather: One of NOAA's major categories of assets. Property under this category does not relate to weather or climate forecasting. It includes property being leased by NOAA where the lease meets one of the four criteria for capitalization of a lease. The four lease capitalization criteria are: (1) that the lease transfers ownership; (2) the lease contains a bargain purchase option; (3) the lease term is equal to or greater than 75% of the remaining estimated economic useful life; and (4) the net present value is equal to or greater than 90% of the fair market value.

Capital Lease – Weather: Same as Capital Lease – Non Weather except that property under this category relates to weather or climate forecasting.

Capitalized Personal Property: Non-expendable personal property with a useful life of 2 years or more and an original acquisition value of $200,000 or more. Capitalization is a financial term which means that the acquisition cost of the asset is recorded in the general ledger of the agency's financial management accounts and its cost is expensed over the asset's useful life in the form of depreciation. Bulk purchases of assets that individually cost $25,000 or more and total $1 million or more are also capitalized.

CASC: Central Administrative Support Center (CASC) used to be one of NOAA's five regions. It was renamed Kansas City Region, but is no longer active.

Chief Administrative Officer, Office of the (OCAO): Provides NOAA-wide technical guidance and staff support to the Office of the Under Secretary in the areas of facilities management, personal property, project planning and management, internal controls, Freedom of Information Act, competitive sourcing, OIG/GAO liaison, safety and environmental compliance directives, records management, civil rights, Equal Employment Opportunity, and other administrative support services. The office provides policy, management and operational direction for the five geographical regions.

Chief Financial Officer, Office of the (OCFO): Serves as the principal financial manager for an organization whose annual appropriated resources approach nearly $4 billion and whose recorded capital asset value exceeds $5 billion. The Office of the CFO

has the responsibility under the CFO Act to provide the leadership necessary for NOAA to obtain a yearly unqualified opinion in the audit of its consolidated financial statements. The areas under the direction of the CFO are the Budget and Finance Offices.

Chief Information Officer, Office of the (OCIO), and High Performance Computing and Communications (HPCC): Implements the provisions of the Clinger-Cohen Act of 1996, the Paperwork Reduction Act, and other directives regarding the acquisition, management, and use of information technology (IT) resources. The OCIO leads the improvement of NOAA IT operations and service delivery and promotes NOAA's effective use of IT to accomplish its mission. The OCIO conducts NOAA's principal IT research through the NOAA High Performance Computing and Communications (HPCC) program, and provides advice to NOAA management on information resources and information systems management. The OCIO also promotes and shapes an effective strategic and operational IT planning process for NOAA, coordinates the preparation of NOAA's IT budget, oversees selected NOAA-wide operational IT systems and services, and is responsible for other assigned programs that are interagency and/or international in scope.

Comm., Detect. & Rad. Eqpt.: (FSC Group Code 58, Communication, detection, and coherent radiation equipment) Includes telephone & telegraph equipment, communications security equipment & components, teletype & facsimile equipment, radio & television equipment, radio navigation equipment, Intercommunication & public address systems, sound recording & reproducing equipment, video recording and reproducing equipment, radar equipment, underwater sound equipment, visible & invisible light communication equipment, night vision equipment, emitted & reflected radiation, stimulated coherent radiation devices, components & accessories, electronic countermeasures, counter-countermeasures & quick reaction capability equipment, and miscellaneous communication equipment.

Construction Work-In-Progress (CWIP): A temporary "holding account" for collecting costs during projects related to the acquisition of capital property, plant and equipment (PPE). CWIP projects are defined by the following: (1) having an aggregate acquisition cost of $200,000 or more; (2) having an estimated service life of two years or more; (3) provides a long-term economic benefit to the organization which maintains or obtains control; (4) not intended for sale in the ordinary course of operations; and (5) will eventually be capitalized and reported in the financial statements.

Corporate Offices: NOAA has five Corporate Offices. The Corporate Offices include Acquisition and Grants Office (AGO), Office of the Chief Administrative Officer (OCAO), Office of the Chief Financial Officer (OCFO), Office of the Chief Information Officer (OCIO) and High Performance Computing and Communications (HPCC), and Work Force Management (WFM).

NOAA Personal Property
GLOSSARY OF TERMS

CRS (Console Replacement System): One of NOAA's major categories of assets. Though partnerships with public and private organizations, CRS delivers high-quality products useful for coastal resource management decision-making. Their products and services include tools to deliver remotely sensed imagery and derived products; land cover and land cover change data sets; high-resolution beach topography data; benthic habitat and change data sets; tools to monitor harmful algal bloom movement; models and techniques to evaluate water quality in estuarine habitats; training modules for coastal applications; and methodologies for conducting mapping projects.

Current Period Adjustments: Changes made to capitalized property records in the current accounting period which were made in the current fiscal year. Only the net dollar impact on the current period is shown in the report.

Deletions: Assets for which final events were recorded in the data base during the current accounting period and that were included in the previous accounting period's ending balance.

Depreciation Expense: Calculated through the systematic and rational allocation of the cost of the property, less its estimated salvage value, over the estimated useful life of the property. It is calculated based on acquisition cost, the number of days an asset has been in service, a useful life determined either by the object class, the Federal Supply Class or a variable useful life provided by the responsible Line Office Property Custodian (PC) or Property Accountability Officer (PAO), and either a one percent salvage value or a salvage value based on the Federal Supply Class. NOAA depreciation is calculated using a 360-day year.

Office of the Under Secretary (USAO): It oversees the Line, Staff and Corporate Services Staff Offices.

Donated Transmitters: One of NOAA's major categories of assets. These transmitters are part of the NOAA National Weather Service Weather Radio network. The ones listed in this category were all donated to NOAA by various city, county, state, and private organizations. NOAA Weather Radio continuously broadcasts National Weather Service forecasts, warnings and other crucial weather information. NOAA Weather Radio is the lone government- operated radio system that provides direct warnings to the public for natural and man- made hazards, from floods to forest fires, to oil spills. It also is the primary trigger for activating America's Emergency Alert System on commercial radio and television stations.

EASC: Eastern Administrative Support Center (EASC) used to be one of NOAA's four regions. It has been renamed Norfolk Region.

NOAA Personal Property
GLOSSARY OF TERMS

Ending Balance: Equals the beginning balance plus additions, less deletions, plus or minus any adjustments (both current and prior period).

Executory Costs: Portion of lease payments that relate to taxes, maintenance, and insurance.

Fisheries Service: One of NOAA's six line offices. NOAA Fisheries Service is responsible for the management, conservation and protection of living marine resources within the United States' Exclusive Economic Zone (coastal waters from three to 200 mile offshore). NOAA Fisheries Service assesses and predicts the fish stock levels, ensures compliance with Fisheries regulations and works to reduce wasteful fishing practices. NOAA Fisheries Service works to promote sustainable fisheries and to prevent lost economic potential associated with overfishing, declining species and degraded habitats.

General Purpose ADPE: (FSC Group Code 70, Automatic data processing equipment, software, supplies, and support equipment) General purpose, automatic data processing components and equipment systems created from them, regardless of use, size, capacity or price, that are designed to be applied to the solution or processing of a variety of problems or applications and are not specifically designed (rather than configured) for any specific application.

Headquarters: One of NOAA's four regions.

Instruments & Lab Equipment: (FSC Group Code 66, Instruments and laboratory equipment) Includes navigational instruments, flight instruments, auto pilot mechanisms & airborne gyro components, engine instruments, electrical & electronic measuring & testing instruments, chemical analysis instruments, physical properties testing & inspection, environmental chambers & related equipment, laboratory equipment & supplies, time measuring instruments, optical instruments, test equipment, components & accessories. Also includes geophysical instruments, meteorological instruments & apparatus, hazard-detecting instruments & apparatus, scales & balances, drafting, surveying & mapping instruments, liquid & gas flow, liquid level & mechanical motion measuring instruments, pressure, temperature & humidity measuring & controlling instruments.

Line Offices: NOAA has six major Line Offices. The Line Offices include Program Planning and Integration, NOAA Fisheries Service, NOAA National Weather Service, NOAA Ocean Service, NOAA Research Service, and NOAA Satellites & Information Service.

Major Categories of Assets: NOAA has two groups of Personal Property assets: Non-Weather and Weather. Within these two groups, there are seventeen categories of

assets. These categories include ASOS; AWIPS; Capital Lease – Weather; CRS; Donated Transmitters; NEXRAD; Satellites; Satellite Ground Systems; and Software – Weather in the Weather group, and Aircraft; Capital Lease – Non-weather; Communications, Detection and Radiation Equipment; General Purpose ADPE; Instruments and Laboratory Equipment; Other; Ships and Launches; and Software – Non-Weather in the Non-Weather group.

MASC: Mountain Administrative Support Center (MASC) was the previous name for the Boulder Region.

NOAA Weather Service (NWS): One of NOAA's six line offices. NWS provides weather, hydrologic, and climate forecasts and warnings for the United States, its territories, adjacent waters and ocean areas, for the protection of life and property and the enhancement of the national economy. NWS data and products form a national information database and infrastructure which can be used by other governmental agencies, the private sector, the public, and the global community.

NEXRAD (Next Generation Weather Radar): One of NOAA's major categories of assets. This program acquired, deployed, and commissioned 125 Doppler radars at NWS sites by 1996. These radar systems have helped NWS increase the accuracy and timeliness of warnings for severe thunderstorms, tornadoes, and other hazardous weather events. More recently, NWS initiated product improvements, including moving NEXRAD from a proprietary to an open systems architecture.

Net Book Value: Equals the acquisition cost or value less the accumulated depreciation for the asset.

Non-Weather: Non-Weather is one of the two groups of assets that Personal Property uses to classify its assets. This group includes property that does not relate to weather or climate forecasting (see Weather).

Norfolk: One of NOAA's four regions. It used to be referred to as EASC.

Ocean Services (NOS): One of NOAA's six line offices. NOS works to preserve and enhance the nation's coastal resources and ecosystems along 95,000 miles of shoreline and 3.5 million square miles of coastal ocean. NOS works to balance society's use of the coastal ecosystems with conservation of the nation's coastal and ocean resources.

Other: One of NOAA's major categories of assets. These assets are non-weather and do not fit in any of the other non-weather major asset categories. Examples include computers, sonars, modular buildings, telemetry equipment, etc.

NOAA Personal Property
GLOSSARY OF TERMS

Personal Property: Any property that is not real property. The term excludes records of the Federal Government and naval vessels of the following types: cruisers, aircraft carriers, destroyers, battleships and submarines (FMR §102.36.40).

Prior Period Adjustments: Changes made to capitalized property records in the current accounting period which should have been made in previous fiscal years. Only the net dollar impact on the prior period is shown in the report.

Regions: NOAA Personal Property has four regions that are under the leadership of Team Leaders in two hubs, the Eastern Hub and Western Hub. Within each Hub there are two regions. The Headquarters and Norfolk regions are within the Eastern Hub. The Seattle and Boulder regions are within the Western Hub.

Reconciliation: A roll-forward or summary of account balances plus any adjustments to those accounts.

Research Service: One of NOAA's six line offices. As the primary research and development organization within NOAA, NOAA Research Service explores the Earth and atmosphere from the very surface of the sun to the depths of the ocean. Its role within NOAA is to provide products and services that describe and predict changes in the environment. NOAA Research Service results allow decision makers to make effective judgments in order to prevent the loss of human life and conserve and natural resources. NOAA Research Service conducts research in three major areas: atmosphere, climate, and ocean/coastal resources.

Roll-Forward: Summary of account balances by using the following calculation:

	Beginning Balance
+/-	Prior Period Adjustments
+	Current Period Additions
-	Current Period Deletions
+/-	Current Period Adjustments
	Ending Balance

Salvage Value: Equal to the estimated residual value of the property at the end of its useful life.

Satellite Ground Systems: One of the NOAA's major categories of assets. These assets are support systems to the satellites. They collect data from the satellites,

monitor and control the satellites, and receive and transmit satellite data. The systems are specifically located in Fairbanks, AK, Wallops Island, VA, and Suitland, MD.

Satellites: One of the NOAA's major categories of assets. The satellites must be operational and in orbit to be included in this category.

Satellites & Information: One of NOAA's six line offices. NOAA Satellites & Information Service is dedicated to providing timely access to global environmental data from satellites and other sources to promote, protect, and enhance the Nation's economy, security, environment, and quality of life. It acquires and manages the Nation's operational environmental satellites, provides data and information services, and conducts related research.

Seattle: One of NOAA's four regions. It used to be referred to as WASC.

Ships & Launches: One of NOAA's major categories of assets. It includes ships (Class 1 through 5), smaller boats, and launches. The classes of ships are derived from the tonnage and horsepower and were established by the University-National Oceanographic Laboratory System.

Software – Non-Weather: One of NOAA's major categories of assets. The assets in this category include the written programs and associated documentation pertaining to the operation of computer systems that are non-weather related.

Software – Weather: Same as Software – Non-Weather except property under this category relates to weather.

Staff Offices: NOAA has several Staff Offices. The Staff Offices include General Counsel (GC), Office of Education, Program Analysis and Evaluation, Legislative Affairs, Public, Constituent and Intergovernmental Affairs, Marine and Aviation Operations (NMAO), Office of the Federal Coordinator for Meteorology, Decision Coordination Office, Program Coordination Office, and Office of Military Affairs.

Unreconciled Payments Report (UPR): A report of payments for non-expendable personal property for which accountability records are incomplete. Payments appear on the UPR when the NOAA Finance Office has paid the vendor but the information has not been entered into NOAA's Sunflower Property Management Information System (PMIS).

Useful Life: The normal operating life in terms of utility to the owner. The default useful life is based on either the object class code if the asset was acquired prior to 10/1/2002 or the useful lives established for certain Federal Supply Classes in OMB Circular A-76.

WASC: The Western Administrative Support Center (WASC) was the name of one of NOAA's regional property offices. It has been renamed Seattle Region.

Weather: One of the two groups of assets that Personal Property uses to classify its assets. This group is defined to include property that relates to weather or climate forecasting. Examples include NEXRAD and ASOS.

Workforce Management Office (WFM): Provides human resources operational and policy support, payroll management, and organizational management for NOAA Line and Staff Offices. It also manages all NOAA-wide Senior Executive Service (SES) WFM activities.

NOAA Personal Property
DESCRIPTION OF FINANCIAL REPORTS

Tab 1 - Year-to-Date Acquisition Cost Reconciliation: This report presents the fiscal year's activity-to-date acquisition costs by asset category from Sunflower (Sunflower Acquisition Cost Roll-Forward) plus any adjustments made subsequent to the date that the Sunflower report was run.

Tab 2 - Year-to-Date Accumulated Depreciation Reconciliation: This report presents the fiscal year's activity-to-date accumulated depreciation by asset category from Sunflower (Sunflower Accumulated Depreciation Roll-Forward) plus any adjustments made subsequent to the date that the Sunflower report was run.

Tab 3 – Detail Support for Year-to-Date Acquisition Cost Reconciliation: This detail support identifies, by asset category, the year-to-date beginning balance, prior period adjustments, additions, deletions, and any current period adjustments for the acquisition cost reconciliation to arrive at the final balances that are reported on the Year-to-Date Acquisition Cost Reconciliation.

Tab 4 – Detail Support for Year-to-Date Accumulated Depreciation Reconciliation: This detail support identifies, by asset category, the year-to-date beginning balance, prior period adjustments, depreciation expense, and deletions to accumulated depreciation for the accumulated depreciation reconciliation to arrive at the final balances that are reported on the Year-to-Date Accumulated Depreciation Reconciliation.

Tab 5 – Monthly Acquisition Cost Reconciliation: This report presents the acquisition costs by asset category from Sunflower (Sunflower Acquisition Cost Roll Forward) plus any adjustments made subsequent to the date that the Sunflower report was run. The acquisition cost reconciliation report displays the final acquisition cost balances for the month.

Tab 6 – Monthly Accumulated Depreciation Reconciliation: This report presents the depreciation for the month and the accumulated depreciation by asset category from Sunflower (Sunflower Accumulated Depreciation Roll Forward) plus any adjustments made subsequent to the date that the Sunflower report was run. The accumulated depreciation reconciliation report displays the final depreciation balances for the month.

Tab 7 – Detail Support for Monthly Acquisition Cost Reconciliation: This detail support identifies, by asset category, monthly beginning balance, prior period adjustments, additions, deletions, and any current period adjustments to arrive at the final balances that are reported on the Monthly Acquisition Cost Reconciliation.

Tab 8 – Detail Support for Monthly Accumulated Depreciation Reconciliation: This detail support identifies, by asset category, monthly beginning balance, prior period adjustments, depreciation expense, and deletions to accumulated depreciation to arrive at the final balances that are reported on the Monthly Accumulated Depreciation Reconciliation.

Tab 9 – Sunflower Financial Assets Summary - Monthly: This report is a Sunflower-generated report that summarizes the useful life, acquisition cost, accumulated depreciation, net book value, and the current month's depreciation by asset category. This report does not include the late adjustments that are included in the reconciliation reports.

Tab 10 – Sunflower Acquisition Cost Roll-forward - Monthly: This report is a Sunflower-generated report, and it summarizes the acquisition cost roll-forward by asset category. This report does not include the late adjustments that are included in the reconciliation reports. The acquisition cost roll-forward displays the elements of:

Acquisition cost beginning balance
+/- Prior period adjustments
+ Current period additions
- Current period deletions
+/- Current period adjustments
Acquisition cost ending balance

This detail reconciliation report identifies the total deletions by asset category for the month and the related adjustments that were made to the Sunflower Acquisition Cost Roll-forward to arrive at the final balances that are reported on the Acquisition Cost Reconciliation.

Tab 11 – Sunflower Accumulated Depreciation Roll-Forward – Monthly: This report is a Sunflower-generated report that summarizes the accumulated depreciation roll-forward by asset category for the month. This report does not include the late adjustments that are included in the reconciliation reports. The accumulated depreciation roll-forward displays the elements of:

Accumulated depreciation beginning balance
+/- Prior period adjustments
+ Current period depreciation
+/- Current period adjustments
- Current period deletions
Accumulated depreciation ending balance

NOAA Personal Property
GLOSSARY OF REPORTS

Tab 12 – Sunflower Lease Roll-forward: This report is a Sunflower generated report, and it summarizes NOAA's capital and operating lease portfolio. It does not include any late adjustments. The operating lease roll-forward includes the Region, document number, barcode number, the future minimum lease payments by year (including the breakout of the total payment between principal, interest, and executory costs), and a description of each lease. The capital lease roll-forward includes the information on the operating lease roll-forward plus an acquisition cost roll-forward and an accumulated depreciation roll-forward. (Executory costs are the portion of the lease payments that relate to taxes, maintenance, and insurance.)

Tab 13 – Sunflower Detail for Prior Period Adjustments: This report is a Sunflower-generated report, and it identifies the specific assets by asset category that were adjusted during the month and make up the total amount of prior period adjustments that are reported on the Sunflower Acquisition Cost Roll-Forward and the Sunflower Accumulated Depreciation Roll-Forward reports.

Tab 14 – Sunflower Detail for Additions: This report is a Sunflower-generated report, and it identifies the specific assets by asset category that were added during the month and make up the total amount of additions that are reported on the Sunflower Acquisition Cost Roll-Forward and the Sunflower Accumulated Depreciation Roll-Forward reports.

Tab 15 – Sunflower Detail for Deletions: This report is a Sunflower-generated report, and it identifies the specific assets by asset category that were deleted during the month and make up the total amount of deletions that are reported on the Sunflower Acquisition Cost Roll-Forward and the Sunflower Accumulated Depreciation Roll-Forward reports.

Tab 16 – Sunflower Detail for Current Period Adjustments: This report is a Sunflower-generated report, and it identifies the specific assets by asset category that were adjusted during the month and make up the total amount of current period adjustments that are reported on the Sunflower Acquisition Cost Roll-Forward and the Sunflower Accumulated Depreciation Roll-Forward reports.

Tab 17 – Sunflower Detail for All Assets by Major Category: This Sunflower report details all the capital assets currently in NOAA's portfolio. It is organized in alphabetical order by major asset category (e.g. Ships and Launches, Airplanes, Satellites). For each asset, the report includes the following information: PIN, Description, Document Type/Number, Steward, Manufacturer, Acquisition Date, Total Acquisition Cost, Model, Month Depreciation, Accumulated Depreciation, and Net Book Value.

Tab 18 – Sunflower Detail for Government Furnished Property: Government furnished property or equipment (GFE) is property originally in the possession of, or acquired by, the Government. These items are delivered or otherwise made available to a contractor for the performance of a contract. This Sunflower report details NOAA capitalized equipment currently being used by contractors.

Tab 19 – Sunflower Detail for Unsupported Items: This report is a Sunflower-generated report, and it identifies the capital assets that were acquired prior 1993 that do not have the supporting documentation required to sustain a complete audit.

Tab 20 – Sunflower Detail for Property Awaiting Disposal: This report is a Sunflower-generated report, and it identifies the assets that have been removed from service; however, they have not been disposed of yet. Depreciation has been stopped on these assets.

Tab 21 – Sunflower Detail for Property Awaiting Deployment: This report is a Sunflower-generated report, and it identifies property that is owned by NOAA; however, the property has not been placed into service yet. The property may be part of construction work-in-process.

Tab 22 – Aging of Unreconciled Payments (UPR): The unreconciled payments report (UPR) is a report of payments made against a capitalized object class code (311x) for which records are incomplete (i.e. the NOAA Finance Office has paid the vendor but the information has not been entered into Sunflower).

Tab 23 – Glossary of Terms: The glossary includes definitions for terms that relate to Personal Property.

Tab 24 – Description of Reports: This section includes descriptions of the reports presented in the tabs of this document.
